APPLICATIONS

ThruFlow™ panels are light weight, water resistant and have an unmatched anti-slip surface. The grated design allows for light penetration, keeping vegetation and species alive below.

ThruFlow™ panels make for one of the best Non-Slip surfaces on any ramp or gangway, exceeding ADA guidelines, even when wet!

ThruFlow™ panels are UV resistant and therefore keep your deck looking new for many more years than other building materials. ThruFlow™ is resistant to rot and insects, and absolutely no treating is required.

ThruFlow™ panels allow debris to pass through your walking surface, keeping your walkway clean. Its non-slip strength and durability are enough to take the punishment of any high-traffic walkway.

ADVANTAGES

The ThruFlow™ decking system offers a number of advantages over traditional decking. ThruFlow™ is a **STRONG, DURABLE** and **LIGHTWEIGHT** application for docks, decks, ramps and walkways.

- **NO** Maintenance
- UV and Static Electricity **PROTECTION**
- **SUPERIOR** Load Bearing Capability
- 360° **NON-SLIP** Surface
- Available in **3, 4** and **5** foot lengths
- Pre-Drilled and Countersunk for **EASY** Installation
- **ALLOWS** Sunlight, Water and Debris Through
- Helps **MINIMIZE** Storm Surge and Wave Effects
- Stays **COOL** Even in the Hot Summer Sun
- **ACOE** Approved
- **ADA** Compliant
